

Good morning/ Günaydin,

I'll like to begin by thanking God almighty for this day, and on behalf of me and my fellow graduates I'd like to thank the faculty and the administrative staffs for their tremendous support through the years. Also special thanks to the dean of the faculty, Professor, Dr. Süleyman Tolun for his guidance and advices through the years which I'm sure will help in the future.

When I arrived at the University of Kyrenia in 2019, I was just a 16 years old teenager who has a dream of been an Aeronautical engineer but uncertain on how to go about it. But within my years here, with the help of my lecturers and my mates I've understood that there are different routes to achieve that dream and we all the graduates I'm sure have been equipped with the necessary tools to go into our various professional worlds and solve existing problems with new solutions and be good ambassadors of our origin.

Finally, a big congratulations (Tebrikler çok sevindimm) to those of us graduating, because I know the sacrifices, we all had to make not just to have a pass mark but also to make our parents/guardian smile. I wish everyone the very best.

İyi şanslar arkadaşlar.

David Amos Olanrewaju.
